

EXHAUSTS

EXHAUSTS

EXHAUST KITS WITH 90 DEGREE ELBOWS

Kits are made for trucks built in the year 2006 and down. Complete for both sides.

ALL KITS INCLUDE:

- TOP STACKS - 54" OR 60" HIGH (2 UNITS)
- MIDDLE SPOOLS - 52" HIGH (2 UNITS)
- 90 DEGREE ELBOWS (2 UNITS)
- 3 3/4" WIDE BAND CLAMPS (4 UNITS)
- LOWER MOUNTING BRACKETS (2 UNITS)
- BLACK BUSHINGS (8 UNITS)

All elbows are reduced to 5" in diameter so you can use them with a 5" diameter "Y" pipe. All clamps are high quality chrome stainless steel allowing the clamp to have the same mirror shine as the exhaust for a clean uniform look.

TSK10-F60T	10" Diameter, Flat Top, 60" Long Stack Top

EXHAUSTS

MIDDLE SPOOLS WITH PLAIN BOTTOM

Middle spools are made for trucks built in the year 2006 and down.

These spools come with an additional tapered sleeve measuring 8" attached to the top of the spool. This extra reduced sleeve fits INTO the bottom of any top stack (corresponding to the correct diameter) and gives the kit extra support and strength.

For Peterbilt 379 : use 52" spools if the year of the truck is between 1987-2003. Use 55" spools 2003-2006 (Some late model Peterbilt 379 in the year 2003 may need 52" spools) Please measure the distance between your upper and lower exhaust brackets for exact dimensions.

ATTENTION! THE BELOW MEASUREMENTS ARE THE LENGTH OF EACH SPOOL AND DOES NOT INCLUDE THIS ADDITIONAL REDUCED SLEEVE. IN OTHER WORDS, WHEN EVERYTHING IS ASSEMBLED CORRECTLY, YOU WILL BE ABLE TO VISUALLY SEE EITHER 52" OR 55" SPOOLS.

TSK10-55S	10" Diameter, Middle Spool, 55" Long

MIDDLE SPOOLS WITH 5" REDUCED INNER DIAMETER BOTTOM

Middle spools are made for trucks built in the year 2006 and down.

These spools come with an additional tapered sleeve measuring 10" attached to the top of the spool. This extra reduced sleeve fits INTO the bottom of any top stack (corresponding to the correct diameter) and gives the kit extra support and strength. * Your common 5" outer diameter elbows will fit inside these spools.

For Peterbilt 379 : use 52" spools if the year of the truck is between 1987-2003. Use 55" spools 2003-2006 (Some late model Peterbilt 379 in the year 2003 may need 52" spools) Please measure the distance between your upper and lower exhaust brackets for exact dimensions.

ATTENTION! THE BELOW MEASUREMENTS ARE THE LENGTH OF EACH SPOOL AND DOES NOT INCLUDE THIS ADDITIONAL REDUCED SLEEVE. IN OTHER WORDS, WHEN EVERYTHING IS ASSEMBLED CORRECTLY, YOU WILL BE ABLE TO VISUALLY SEE EITHER 52" OR 55" SPOOLS.
