This publication contains data on Spicer center yokes and ball stud tube yokes for double cardan driveshafts and Spicer tube yokes for single cardan driveshafts.

HOW TO IDENTIFY A CENTER YOKE USING THIS CATALOG

To identify any center yoke, three pieces of information are required:

1. Determine the Series
2. Determine the dimension between center of U-Joint to center of U-Joint
3. Determine the type of part (circular or rectangular)

Example: To find a 1310 Series rectangular type, with a center to center dimension of 2.75, see the following example:

1. Find the 1310 Series heading
2. Find the Center to Center dimension of 2.750
3. Find a type 1 (circular is type 2, rectangular is type 1)

Order Spicer Center Yoke Part Number 2-26-177

Be sure to read any notes that are provided.

Series and all pertinent series dimensions appear as shown in the sample below:

C Center to Center	Swing Diameter		Type	Center Yoke

HOW TO IDENTIFY A TUBE YOKE USING THIS CATALOG

To identify any tube yoke, three pieces of information are required:

1. Determine Series
2. Determine the size and wall thickness of the tube it fits
3. Determine the dimension from center of joint to weld point

Example: To find a 1330 Series with a 2.000 center to weld dimension, that fits a 2.750 OD tube with a .065 wall thickness, see the following example:

1. Find the 1330 Series heading
2. Find the 2.750 Tubing Diameter and .065 wall thickness (2.750 x .065 - S=Seamless, W=Welded)
3. Find the 2.000 Center to Weld dimension

Be sure to read any notes that are provided. Order Spicer Tube Yoke Part Number 5004393

Series and all pertinent series dimensions appear as shown in the sample below:

HOW TO IDENTIFY A BALL STUD TUBE YOKE USING THIS CATALOG

To identify any tube yoke, the following information is required:

1. Determine the Series
2. Determine the size and wall thickness of the tube it fits
3. Determine the dimension from center of joint to weld point
4. Determine the center of the joint to the end of the ball stud dimension
5. Determine the diameter of the ball stud
6. Determine the length of the ball stud
7. Determine the configuration and dimensions of the slinger or seal (if the part has a slinger or seal)

Example: To find a 1310 Series ball stud tube yoke with a 1.438 center to weld dimension, that fits a 2.000 OD tube with a .120 wall thickness and a .500 diameter ball stud, see the following example:

1. Find the 1310 Series heading
2. Find the 2.000 Tubing Diameter and .120 wall thickness (2.000 x .120W)
3. Find the 1.440 Center to Weld dimension
4. Find the 1.641 Center to End of Ball Stud dimension
5. Find the .594 Ball Stud Length
6. Refer to the slinger and seal illustrations on page 13 to determine which seal/slinger configuration you have.

If you have a seal, order Spicer ball stud tube yoke assembly part number 2-28-2867X

If you have a slinger, order Spicer ball stud tube yoke assembly part number 2-28-2947X

Be sure to read any notes that are provided.
